# External Simple Paired Differences (Incremental - MetaGPT)

| Metric | Difference | 95% CI | p | Holm p |
|---|---|---|---|---|
| E2E (pp) | +73.3 | [+56.7, +86.7] | 0.002 | 0.006 |
| PFS (points) | +2.83 | [+1.97, +3.67] | 0.002 | 0.006 |
| MFS@4 (pp) | +40.0 | [+13.3, +66.7] | 0.047 | 0.047 |

Incremental minus MetaGPT; n=10 paired Simple tasks x 3 observed runs. Positive quality differences favor Incremental; pp denotes percentage points.
95% pointwise task-cluster bootstrap CIs; exact two-sided tests enumerate 1,024 task-level swaps (K/1024, no plus-one correction).
Holm p adjusts only these 3 external comparisons.
CIs condition on observed repeats and are not Holm-adjusted. * Zero-width empirical CIs do not imply certainty.
