External Comparison on Simple Tasks (Run 3)

Method	Complexity	E2E	PFS	MFS@4
Incremental	Simple	90.0%	3.00	40.0%
MetaGPT	Simple	10.0%	0.40	10.0%

Simple tasks only: 10 paired tasks, with one assessed module per task and run. Values summarize one run across the matched tasks; repeats are not additional independent tasks.
E2E requires both the front end and back end to pass build/compilation and startup checks; it does not imply complete business functionality.
